

Meet Becky Barrett

I graduated in 1973 with my BSN from Pittsburg State University. My first nursing job was on a 14 bed mental health inpatient unit. From 1976 to 1983 I taught at the Pittsburg State University Nursing Department as an instructor while working on my Masters Degree in Nursing from Wichita State University. I completed my Masters in May 1985.

My school nursing career began in September 1983 with Pittsburg Community Schools at the middle school and three elementary schools. Currently I divide my day between the middle school and one elementary school.

I joined KSNO in the mid 80s and have served on the board as a member at large and District #2 Representative. As representative since 2000 I have really enjoyed getting to know the school nurses of southeast Kansas. Being a member of the board has allowed me to build a valuable professional network and many lasting friendships.
